SALE INFORMATION

FERTILITY: We endeavour to ensure that all bulls are capable of service, structurally sound and in satisfactory working condition at time of sale. All bulls were semen tested on 10/11/2025 and are guaranteed fertile for 12 months from the date of sale.

No warranty is given for any bull, which becomes infertile or incapable of natural service due to illness, injury or disease. If a bull should prove infertile, the purchaser must notify the vendor in writing accompanied by a veterinary certificate of infertility. The vendor retains the right to obtain independent veterinarian confirmation of any claim.

CONDITIONS OF SALE: The bidder/buyer number system will be used. The conditions of sale are those laid down and displayed by the selling agents. Please register with the selling agents on sale day. Please note that all animals are sold on a GST exclusive basis. GST of 10% will be added to the purchase price.

NLIS: Intending purchasers please bring your PIC (NLIS) number for ownership transfer.

TRANSFERS: Please supply your three letter Angus Australia Herd ID

TELEPHONE BIDDING: Telephone bidding is available, please contact Brad McDonnell of Elders on 0455 442 702 to arrange.

AUCTIONSPLUS: All lots will be available for online bidding via AuctionsPlus. For more information on how to participate visit <http://www.auctionsplus.com.au>.

INSURANCE: If a client wishes to insure stud stock animals they will be advised to contact their broker direct or if there is an Elders Insurance representative present at the sale to see them

INJECTIONS: Bulls are Zoetis STAR BREEDER program certified to provide maximal protection against reproductive diseases. This means they have been ear-notched and tested not persistently infected with BVDV (Pestivirus), and have received two injections each of Pestigard, Ultravac 7in1 and Vibrovax. Bulls have also been injected with vitamin B12 plus selenium.

JOHNE'S BEEF ASSURANCE SCORE (J-BAS): The Gandy Angus herd is maintained at the J-BAS 8 level.

ATTENTION ALL PURCHASERS: Please ensure you complete a purchaser's instruction slip available from the registration desk. Verbal instructions cannot be accepted.

DISCLAIMER: All reasonable care has been taken to ensure that the information provided in this catalogue is correct. However neither

the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this catalogue.

PV: both parents have been verified by DNA, SV: the sire has been verified by DNA,

DV: the dam has been verified by DNA, #: DNA verification has not been conducted

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively

ATTENTION BUYER: Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

SEMEN RIGHTS: Gandy Angus reserves the right to use any semen previously collected from a sale lot for their own use or to collect semen for their own use, from any sale bull at their cost and the purchaser's convenience. Gandy Angus retains 50 percent ownership in all semen rights.

REBATE: A 3% rebate is offered to outside agents introducing buyers to the selling agent prior to the sale and settling within 7 days. Outside agents must attend the to be eligible.

EASTERN STATES FREIGHT: Transport will be arranged by Gandy Angus and provided by Falls Livestock Transport at a cost to the purchaser of \$500 per bull to the Falls Livestock Depot in Finley, NSW. The purchaser will then organise their freight from the depot. Please contact us to discuss or arrange alternatives.

Welcome to the 2025 Gandy Angus Annual Bull Sale

We are pleased to catalogue these 62 bulls and offer incredible value with this November sale. After 35 years of selling in traditional February/March sale run and wondering why we were selling bulls at the end of a hot, dry summer- Kim made the decision that late November would be the ideal time as the bulls are ready and thriving from spring grass. Selling the bulls prior to the hot, dry summer fits our feed and production system, reducing stress and significantly reduces labour. The bulls are ready in November, without being pushed and although risky that is when we offer them, providing buyers exceptional value. We sincerely appreciate your support of this sale and allowing us to continue offering bulls at this time of year.

The continued performance of Gandy Angus bulls is pleasing with excellent results achieved by clients across markets, including MSA grading competitions. We have three bulls currently in Angus Australia Sire Benchmarking cohorts – 13, 14 and 15, being benchmarked alongside some of the best and most popular sires from Australia, New Zealand and the US. The benchmarking begins at AI and progeny are tracked right through to carcass quality for the steers and the heifers are bred.

Gandy Fair N Square T2 is in Cohort 14. We used him on our heifers, and he has 6 sons in this sale. He has had an excellent conception rate and ranked 1st for gestation length, and 3rd for docility in a cohort of 30 bulls.

Gandy All In Q202 (Diamond One All In Q202) has ranked 1st out of 26 bulls for 400 and 600 Day Weight, 2nd for 200 Day Weight, Docility and Foot Angle, 6th for claw and 7th for EMA. His progeny average 39.5kg for birthweight, which is ideal, we do not want too small of calves.

We focus on the fertility of the herd with excellent results. From one round of natural heat, AI done by Kim followed by 2 cycles with yearling bulls, our results this year were outstanding, 3 mobs of 60 cows each had 100% conception rate, including our second calvers and all other mobs had only 1 or 2 not to get in calf.

Raw data has been included for each lot – the actual birthweight, 600 Day weight, rib, rump, EMA and IMF. Please contact us for any further raw data. All bulls have been scanned on the 16th of October 2025.

The EBVs you see in the catalogue are a byproduct of 40 years of breeding a maternal base of cows that produce consistent, powerful progeny that are incredibly even and provide top percentile EBVs. We aim to produce cattle that are docile, fertile, structurally sound with longevity.

Thank you for your interest,

Kim and Lex

Purchaser:..... \$:.....

UNDERSTANDING THE INFORMATION

- 1 PV - Parent Verified: both parents verified by DNA.

SV - Sire Verified: sire verified by DNA.

2 The Accuracy of the EBV, the higher the percentage the more accurate the EBV.

3 The Percentile Band of the breed the animal sits in for that trait whole population.

4 V31 has a 400W of +106 at 81% accuracy which is in the top 18% of the breed for 400 day weight.
- 5 Traits Observed: measurements we have taken.

6 Genomics: DNA testing that has been conducted.

7 Actual birth weight of the animal. The majority of calves are born in a tight band of actual birthweights and a couple of kilograms in additional birthweight can be easily handled by most females

8 Genetic Status

9 Registration Status: all catalogue Herd Book Registered (HBR).

4 PERCENTILES, HOW TO USE

Using the percentiles that any trait sits within allows you to quickly identify exactly where an animal ranks within the breed. The 50th percentile is breed average.

1 means the animal is in top 1 percent of the breed.

For majority of traits it is considered desirable to rank closer to the top 2 percent of the breed, but it is not always the case i.e. MCW where you are wanting a moderate cow.

CARING FOR YOUR NEW BULL

Respect your bulls, and handle them quietly, walk them rather than rushing them. Treat them with care and in a gentle manner and they will do likewise to you. A bull leaving Diamond Tree is leaving the security of the mob and will arrive in a strange environment at the purchaser's property. Unload him and make sure he has a steer or cow as a companion straight away, if you can't put him out into the mob immediately.

A young bull can move in with older bulls and settle in well, but remember, being the youngest, he will get the last of any feed available, due to the pecking order. The paddock needs to be reasonably large so he can keep away from the others and find adequate feed.

Young bulls are still growing fast and need enough feed to maintain their growth pattern and be able to settle with the cows quickly and efficiently.

Diamond Tree bulls are all injected with 7in1 vaccine (for protection against leptospirosis, pulpy kidney disease, tetanus, blackleg, black disease and malignant oedema) twice at 3 months of age, at a six weekly interval and then they receive a booster as a yearling. A booster injection of Ultravac 7in1 must be given every 12 months to maintain immunity.

When the bull is finished with the cows for the season we suggest he should be drenched and injected with vitamin B12 with selenium. Regular injections of B12 with selenium and drenching will help ensure the ongoing health of your bull. These bulls will handle approximately 50 cows on their own, or can go in with 100 cows after a good artificial insemination programme.

Diamond Tree bulls are used to being handled with vehicles, four wheeler motorbikes and by stockman on foot. The fences are electrified and the bulls treat them with respect.

You must always keep a regular watch over your bull when he is out with the cows, as accidents can happen. Every day he is not working will cost you dollars. During the mating season, boundary riding should include the observation of bulling cows, and the bull serving. This is easy because the cows will group together, have full bags of milk and will be followed by male calves.

If the bull does not behave in a normal manner serving, he must be replaced immediately. If a cow has been served before the observer arrives, the bull may not repeat the performance. It has been noted that bulls can simply scratch their penis on dry manure on a cow's backside, infection can set in and a very large and alarming looking appendage can form. If treated quickly and efficiently this can be remedied.

Our veterinary advice is that a suspected broken penis is often just an infection and if observed straight away can be treated and cured.

When the season is finished, the bull should be drenched and put away with enough feed in front of him. Adequate feed will help stop fighting and help the bull settle into the bull group.

Always be considerate to your bull and handle him with respect. You will find you will receive this respect back from him.

CSBP FERTILISERS
IS A PROUD SPONSOR
OF THE **GANDY ANGUS
BULL SALE.**

We'd like to wish Gandy Angus and
prospective buyers all the best
for this year's sale.
