Annual Bull Sale

18TH FEBRUARY 2025 3:30PM (SA TIME)

Inspections from 1pm

OFFERING 120 BULLS

3% Rebate to outside agents

AuctionsPlus

Welcome

Welcome to our seventeenth annual bull sale.

We have 120 bulls catalogued for sale on Tuesday February 18th (3:30pm SA time). This year's draft are consistent and true to the Nampara type - heavily muscled, big bulls who cover some ground and have a quiet disposition.

The Texas Powershift P632 bulls do not disappoint again and need no introduction. For the last two years they have been our highest averaging sire group and are an imposing set of bulls again this year. Long, wide, plenty of bone and frame to hang off some meat. They are impressive across the board but in particular calving ease, explosive growth and carcass merit. Hard to beat for weight for age and phenotype, Powershift has certainly done his job for us.

In a similar style to the Powershift sons, Nampara Junior Q148 has a solid run of bulls in the sale. Our top-priced bull in 2021, the Q148 sons really stand over some ground. Real cow bulls to put some weight in their calves. Our first draft of Dunoon Prime Minister bulls do not disappoint and fit right in. Once again, plenty of frame but carcass to go with it. We have been pleased with the consistency and shape he has delivered in his calves.

Texas Iceman, the \$225,000 yearling bull sold in 2021, has left a group of heifer bulls that will appeal to many. Smooth through the front that follows through with thickness behind, Iceman, like his stablemate, Brad Pitt has left bulls that are very good for calving ease and birth weight with plenty of shape and muscle. Consequently, a number were selected to join 500 PTIC females destined for the Naracoorte and Mortlake feature female sales in January. These low birth weight, high growth bulls specifically selected for heifer joining have proved popular in the past.

All Nampara bulls are structurally assessed and fertility tested and are well known for their quiet temperament. By assessing structure, temperament and calving-ease, and by using a limited number of sire lines over large mobs, we can more accurately appraise the impact a sire is having within the herd. The joined heifer program also means that we are aiming to breed the type of heifer bulls that can be confidently used to mate heifers whilst at the same time not compromising on shape or frame.

Buyers who cannot attend the sale in person will be able to operate through AuctionsPlus. We also have independent people available to assess bulls on your behalf. We welcome any enquiries before the sale to ensure your selection of bulls suits your breeding program. All sale bulls are guaranteed into their first working season and Nampara has a JBAS 6 status. The bulls have been vaccinated for Vibrio, Pestiguard and a 7 in 1 needle including their follow up vaccinations.

We are proud to present a quiet draft of bulls with sire lines that are true to their type. This allows buyers to select from a number of bulls within each sire grouping. We are also proud of the fact that our cattle are working and making a difference in the commercial world, the true driver of profit which is, and should be, why we do what we do.

If we can be of assistance to you prior to, or after the sale, please do not hesitate to contact us.

Stuart and Natalie Hann

NAMPARA ANGUS - SALE BULLS 2025

Inspection of Bulls On the property from 1pm on the afternoon of the sale. Bulls will be on display on Thursday 30th January as part of the Victorian Beef Week at Mortlake as well as our on property open day on Tuesday 11th February as part of the SA Beef Week or for inspection on property any time by arrangement.

Delivery To be co-ordinated immediately after the sale, either to be trucked directly from the property or arrangements made with the vendor to paddock animal/s until trucking available. Bulls will be delivered free within 150km of Nampara and all bulls sold will be freight assisted.

Fertility All bulls are guaranteed fertile and have been tested on the 14th January 2025 by Drew Pickford of Nationwide Artificial Breeders. Notice of infertility in all cases of such, are to be in writing and in the hands of the vendor no later than six calendar months from the date of the sale.

The purchase price of any bull proved to be infertile shall be refunded in full (less the salvage value) without interest expense, cost or damages in the form of a credit at a future bull sale. A vet's certificate shall be produced by the purchaser when required.

Semen Rights Nampara retain the right to collect semen out of any bull in the sale. Nampara will collect semen at the vendor's expense and the purchaser's convenience.

Rebate 3% to outside agents introducing buyers in writing to the selling agents 24 hours prior to the sale and settling within seven days. Does not apply to affiliates of selling agents.

GST All lots are sold exclusive of GST.

Insurance Nampara recommends insuring all purchases at the fall of the hammer. An Elders insurance representative will be available on sale day to assist with this.

Guarantee In the event of a bull proving to be infertile or incapable of natural service into their first working season, the vendor will credit the purchase price, less the salvage value of the bull, provided the problem is not caused by injury or disease incurred since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain an independent veterinary confirmation of any claim. In the unlikely event that a credit is issued, it may only be claimed at a future bull sale.

Disclaimer Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue and the information, neither the vendor, selling agents or representatives thereof assume any responsibility what so ever for the correctness, use or interpretation in the information of animals included herein.

Trans Tasman Angus Cattle Evaluation

Calving Ease DIR (%) Estimates of the genetic differences between animals in the ability of their calves from 2yr old heifers to calve without assistance. Positive values are desirable.

Calving Ease DTRS (%) Estimates of the genetic differences between animals in the ability of their 2yr old daughters to calve without assistance. Positive values are desirable.

Gestation Length (days) Estimation of the genetic differences between animals in the number of days from conception to the birth of a calf. A negative value is desirable.

Birth Weight (KG) Estimates of the genetic differences between animals in calf birth weight.

200-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight Estimates of the genetic differences between animals in cow weight at 5yrs of age.

Milk Estimates of the genetic differences between animals in milk production, expressed as variation in 200 day weight of daughter's calves.

Scrotal Size Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight Estimates the genetic differences among animals in hot standard carcass weight at 650 days of age.

Eye Muscle Area (EMA) - cm² Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcass.

Rib Fat Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300kg carcass.

Rump Fat Estimates of the genetic differences among animals in fat depth at the P8 rump site on a standard 300kg carcass.

Retail Beef Yield Estimates of genetic differences among animals in percentage retail beef yield in a 300kg carcass with 2-3mm fat trim, adjusted to 85% chemical lean.

Intra-Muscular Fat % (IMF%) Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300kg carcass.

Explanation of Raw Data Information

Actual Eye Muscle Area (cm²) The actual eye muscle area recorded for Breedplan data.

Actual Intra-Muscular Fat (%) The actual recorded percentage of intra-muscular fat for Breedplan data.

Scrotal Circumference The actual scrotal circumference measurement recorded.

P8 (mm) The actual measurement of fat depth at the 12/13th rib site.

Explanation of the Beef Class Structural Assessment System

The Beef Class Structural System uses a 1-9 scoring system for feet and leg structure:

A score of 5 is ideal

A score of 4 or 6 shows slight variation, but this includes most sound animals

An animal scoring 4 or 6 would be acceptable in any breeding program

A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs

A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing

A score of 1 or 9 should not be catalogued and are considered immediate culls

Beef Class Structural Assessment to be conducted by Accredited Assessor:

Max Bowman (#1026) prior to sale.

A note on Semen Testing

As with any species, fertility can be a problem. This is why Nampara semen test ALL sale bulls.

Bulls are examined by Nationwide Artificial Breeders for abnormalities including warts, penile fraenum and erection issues, as they undergo a physical examination of external genitalia and conformation.

This crush side test involves analysis of spermatozoa for motility, concentration, morphology and semen infections. This information provides testicular and epididymal function which helps predict the potential fertility of the bull. Only bulls that pass are certified and made available for sale.

A satisfactory result gives a high chance of fertility HOWEVER, please observe your new bull in action when first in service, complete with a thrust!! Stress of an animal can also affect fertility. Look after your bull! The most conscious producer will semen test all herd bulls, every year, before joining.

For any questions, contact Drew Pickford, Nationwide Artificial Breeders Pty Ltd.

Used Over Cows

What a powerhouse to start the sale! An absolute standout since birth. There is so much to like about this bull, his growth is off the chart being in the top 3% for 600 day weight and top 7% for carcass weight at a massive +90. He's a bull that oozes muscle and shape and yet carries it with ease. Part of our 2024 show team, U184 was used over spring cows.

Impressive from every angle, we have so much time for this bull and is an absolute favourite at home. U214 has continued to impress us as he has grown and developed into a big, free moving, proud sire. We love his length, his soundness and his disposition. Weighing in at over 1000kg with a massive raw EMA scan of 136cm it is easy to see why his growth figures are at the top end of the breed with carcass weight and retail beef yield in the top 10%. He's a beautiful bull to look at, covers some ground and casts a big shadow. Nampara will sell full possession and 50% semen marketing rights.

Without a doubt one of our favourites. Another bull from our show team who has impressed many with his thickness, depth of flank and bone. He looks heavy and he is heavy. Moderate birthweight – suitable for heifers, but again retail beef yield in the top 7%. Combined with his eye muscle area at +10.9, this is a bull who could suit many jobs. We've loved having him around as he is so so quiet and super cool on the move. Nampara will sell full possession and 50% semen marketing rights.

Possibly one of the picks of the sale. By Powershift and out of a Liberty daughter, this joining has really worked and epitomises the style we are trying to produce. Take a look at his 600 day in the top 3% and massive carcass weight at +92, placing him in the top 5% of the breed. Then take a look at the bull – tremendous bone, width but not extreme in any way. Talk about MEAT – a big rig. Lot 16 is a bull that is worth a 2nd, 3rd or even a 4th look! A ripping calf with a real look at me presence. Nampara will sell full possession and 50% semen marketing rights.

Heifer's First Calf, Used Over Heifers

Not your typical heifer bull here and what an appealing calf he is. Another Baldrige Compass female that has combined so well with Powershift to result in a set of numbers that are impressive in anyone's books. No doubt one of the picks of the heifer bulls. He is thick from front to back, down through his flank and wide across the top. Such an easy bull to admire in the flesh but then take a look at his figures – outstanding calving ease, very low Birth Weight and positive fat. Definitely two ticks on him.

Used Over Heifers

Powershift just works over so many female lines and here's another one. This time out of a Millah Murrah Loch Up female, the numbers are again ticking boxes – calving ease, moderate Birth Weight, huge 600 day at +148, carcass weight and fat cover. A complete spread. The bull himself is smooth fronted and covers some ground. Proven pedigree in Lot 40.

Heifer's First Calf

A heifer's first calf and what a nice combination of numbers. Gestation length in the top 1%, 600 day in the top 20% along with carcass weight and yet still suitable for heifers at only +3.1 for Birth Weight. He's going to grow into an impressive bull.

Heifer's First Calf

Out of a lovely heifer, U13 has excellent calving ease and low Birth Weight suitable for a heifer joining. Rib and Rump fat in the top 4%. A good heifer bull option late in the day.

Heifer's First Calf

Fantastic spread of numbers again on U14 – attractive TACE data for calving ease, Birth Weight EMA and Retail Beef Yield. Hard to believe a heifer's first calf with such width. Very quiet.

Heifer's First Calf

Heifer bull option again in Lot 116. Also out of a heifer this bull's TACE figures suggest his calves will come out easily and grow on. Very quiet bull.
